

## Food Contact Compliance for

1. Rubio Monocoat  
Oil Plus 2C (A+B)

2. Rubio Monocoat Oil  
Plus 2C (A+B) + Rubio  
Monocoat Universal  
Maintenance Oil

## Declaration of compliance

With this declaration we state that if Oil Plus 2C is used on a wooden surface that is in itself food safe, then the combination of the wood and our Oil Plus 2C is also safe and therefore 'food contact compliant', in regulation with EC n° 1935/2004. This declaration is the result of an official test, done by Eurofins, an official independent testing institute. The same goes for the combination of Oil Plus 2C with Universal Maintenance Oil on wood.

Regulation (EC) No. 1935/2004 requires that materials and articles which, in their finished state, are intended to be brought into contact with food, must not transfer any components to the food in quantities which could endanger human health, bring about an unacceptable change in the composition of the food or bring about deterioration in the organoleptic characteristics of the food.

To ensure compliance with Regulation (EC) no. 1935/2004, all chemicals used for Rubio Monocoat Oil Plus 2C (A+B component), Rubio Monocoat Universal Maintenance Oil have been assessed and the products have been tested for migration as described below.

The chemical substances used for these products are either listed in Regulation (EU) no. 10/2011 as amended or in the Swiss Regulation SR 817.023.21, or are classified as not hazardous – meaning that no substances classified as toxic, carcinogenic, mutagenic or dangerous to reproduction are used in the products.

Rubio Monocoat Oil Plus 2C (A+B component) and Rubio Monocoat Universal Maintenance Oil do not contain any dual use additives.

Representative samples of wooden boards treated with these products, applied according to the Technical Datasheet for the product, have been tested for specific migration, MOSH/MOAH, NIAS and sensory properties for 2 hours at 40°C in worst case simulants. All results were below the migration limits, which means, that provided that Rubio Monocoat Oil Plus 2C (A+B component) and Rubio Monocoat Universal Maintenance Oil are applied to the wood and dried/cured according to the information given in the Technical Datasheet, the products will comply with Regulation (EC) no. 1935/2004 for contact with all types of food for a maximum of 2 hours at a maximum of 40°C.

Rubio Monocoat Oil Plus 2C (A+B component) and Rubio Monocoat Universal Maintenance Oil are manufactured in compliance with Regulation (EC) no. 2023/2006 on Good Manufacturing Practice for materials and articles intended to come into contact with food. Furthermore, they comply with Regulation (EC) no. 1935/2004 article 3, 15 and 17 on inertness, labeling and traceability.
